When someone is diagnosed with Alzheimer's or another dementia, friends and family have many questions. What does the diagnosis mean? What kinds of plans need to be made? What resources are available to help? As the disease progresses, new questions reflect growing needs for skills, programs and services.

This program will cover warning signs/symptoms of dementia; the difference between Alzheimer's and dementia; how this brain disease impacts the person's abilities throughout the various stages; how to engage and interact with a loved one living with Alzheimer's or another dementia; how to handle challenging situations. Care Partners/Caregivers will recognize the need for assistance throughout this journey and the *IMPORTANCE in CARING FOR THEMSELVES* along the way.
